The terminal disclaimer filed on 7/6/06 is proper and has been recorded. In view of filing a Terminal Disclaimer, the provisional rejection based on a nonstatutory double patenting ground is withdrawn in this Action.

PART I THE EXAMINER'S EVALUATION OF THE APPLICATION

SECTION A RELEVANT ART CITED BY THE EXAMINER

The prior art made of record and not relied upon are as follows:

- 1. U. S. Patent Publication No. 2003/0159001 A1 to Chalmer et al. describes Distributed, scalable data storage facility with cache memory.*
- 2. U. S. Patent No. 6,912,669 B2 to Hauck et al. describes Method and apparatus for maintaining cache coherency in a storage system.*
- 3. U. S. Patent No. 6,321,298 B1 to Hubis describes Full cache coherency across multiple raid controllers.*

SECTION B DISTINGUISHING FEATURES RECITED IN THE CLAIMS

The following is an Examiner's Statement of Reasons for Allowance See MPEP 1302.14

- 4. The primary reason for allowance of claims 1-2, 6-14, 18-20, and 24 in instant application is the combination with the inclusion of the following limitations: each of cache memories connected to each of the corresponding respective input/output channels; wherein an analysis of the data input/output request is performed to determine whether maintaining consistency of data stored in each cache memory*

Art Unit: 2187

is necessary and the sequence of execution is controlled so that said first operation is executed first if maintaining consistency is not necessary.

5. *The primary reason for allowance of claims 3-4 in instant application is the combination with the inclusion of the following limitations: each of cache memories connected to each of the corresponding respective input/output channels; wherein a consistency maintaining module performs the consistency maintaining processing depending on a content of the data input/output request.*

6. *The primary reason for allowance of claims 15 and 21 in instant application is the combination with the inclusion of the following limitations: each of cache memories connected to each of the corresponding respective input/output channels; the data input/output request includes an identifier for identifying at least one of the logical volumes that is a subject of the data input/output request, and further comprising a module that performs the control of the execution order according to the identifier included in the data input/output request.*

7. *The primary reason for allowance of claims 16-17 and 22-23 in instant application is the combination with the inclusion of the following limitations: each of cache memories connected to each of the corresponding respective input/output channels; a module that, upon receiving a data write request as the data input/output request, writes data designated by the data write request in the disk drive device, and sends a write request for the data to the other disk array device.*

The prior art of record including the disclosures of Chalmer et al. (2003/0159001 A1), Hauck et al. (6,912,669 B2), and Hubis (6,321,298 B1) neither anticipates nor renders obvious the above-recited combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays should be clearly labeled "Comments on Statement of Reasons for Allowance"

PART II THE ATTENTION OF FUTURE CORRESPONDENT

*Any inquiry concerning this communication should be directed to Hashem Farrokh whose telephone number is (571) 272-4193. The examiner can normally be reached Monday-Friday from **8:00 AM to 5:00 PM**.*
